

RHONDA LYONS
EXPERIMENTAL FLIGHT TEST OPERATIONS MANAGER
BOEING COMPANY

As a pilot and licensed A & P mechanic originally from Tennessee, Rhonda obtained her Bachelors of Science degree from Tennessee State University with a focus in Aviation and Aeronautics.

Prior to joining the Boeing Company in 2005, Rhonda spent several years in the United States Army Aviation Maintenance field and spent several years as the Deputy Director of a Flight Academy, which specialized in teaching kids the basics of aviation along with teaching them to fly airplanes.

She currently is a part of the Boeing Commercial Airplane group as an Experimental Flight Test Operations Manager with Test Manufacturing & Quality Operations. Within this position, she is currently assigned to the 787 Dreamliner program responsible for experimental flight-testing and certification activities.

Rhonda is currently completing her Master's of Science Degree from Embry-Riddle Aeronautical University and she enjoys flying and spending time teaching and inspiring others about the world of aviation. She is also involved with various professional and volunteer organizations nationally.
